

HISTORY OF PALESTINE

A BRIEF SOCIAL STORY

Palestine is a country in the Middle East.

The Flag of Palestine is red,
green, black and white.

Palestine is home to many people who are different cultures and religions.

Respecting differences is good!

Some people don't like different things. They want everyone to be the same.

The state of Israel thinks this is the only way to be happy. This is unfair. Not everyone in Israel thinks this is true.

The state of Israel didn't want to share the land. So they took the land from the people already living there.

The Palestinians were told to leave. They were in great danger. Many people got hurt. Many lost all their belongings.

This is called the Nakba, or
“Catastrophe”. It started in 1948.
This is still happening today.

Many Palestinians had to make new homes all over the world.

Some Palestinians still live in occupied Palestine. Occupied means their land was stolen.

Palestinians have the keys to our homes. We will all return to Palestine one day.

We will work together for a free Palestine!
